 - Git
 - Html, Css
 - MongoDB
 - Redux
 - Bootstrap
 - Node js
 - React
 - DSA
 - Rest API
-

PERSONAL

- Faster Self Learning
- Great problem solving skill
- Good communication skill
- High Adaptivity
- Able to work in a team

FAMILIAR WITH

- AWS
-

PROJECTS

E- COMMERCE

- Proficiently developed a comprehensive e-commerce application using Node.js, Express.js, and MongoDB.
- Designed and integrated key features, including user management, order processing, and Razorpay payment gateway integration
- Implemented user authentication and registration functionalities, enhancing the application's security and usability.
- Managed database operations and data storage using Mongoose, ensuring efficient data handling.
- Created an intuitive admin panel to streamline user and order management, enhancing overall operational efficiency
